EXPERIENCE

Para-Professional Tutoring
Part-Time University Tutor for Fundamentals of Computer Science   August 2022 - Present
- Contributed to the school's library education material, supplying documentation and video explanations of certain materials for students to use.
- Worked with many different types of learners and people in a programming context, and further solidified my fundamentals in programming.
- Worked with a team of trained professionals on campus, and had regular communications about methods of teaching and forward progress.

SOFTWARE PROJECTS

Web Development
Personal Development Projects
Personal Project   September 2021 - Present
- Fitness Application - An application to learn new exercises and create personal workout routines, a project meant to strengthen my challenges in web development by working on backend-related problems and utilizing an API to display content.
- Portfolio - My portfolio for displaying who I am and what I have done, this project increased my knowledge on not only animations using CSS and Javascript but also how to accurately create responsive content.

Game Development
First Person Shooter
School Project   September 2021 - January 2022
- The final project in my senior year's video game design course taught me the fundamental development of UI and worked on my skills in animation and modeling using Blender. Got comfortable coding in C# and managing many scripts working off one another.

NSLS

The National Society of Leadership and Success
Presidential Member   October 2022 - Present
- Completed an induction process to join the Society, which included team goal networking, and leadership training.
- Was invited to join this organization due to a facility recommendation and my academic achievements. Which gives me access to social networking and mentor opportunities.
